Cpre 308 – Lab 5 Summary

Lab 5 Summary

In this lab I learned a great deal about the four scheduling algorithms. Before I did this lab I had a very rudimentary understanding of the different scheduling algorithms, but after reading up on them and implementing them successfully for this lab I can now say I have a better understanding of what they do and how they work. While the lab itself wasn't difficult since most of the work was done for us, I would say I had some trouble implementing the round robin priority algorithm. My issue was that I was having a hard time setting up my conditionals to account for process priority, but over time I eventually figured out what I needed to do to get the correct output as shown in the test file. All in all, this lab was a very informative one and it gave me good practice with implementing the different scheduling algorithms.
